Artist Statement - A detailed story about the work for viewer's understanding.

The pinnacle of "TFF" technology before the departure to the moon. Burn it and there is life after that. This is First Man's greatest achievement and contribution on Earth. Since his teens he has been refining the technology, trying to push it beyond the envelope. Most things grew; vegetables, wild bushes, weeds, flowers etc but one thing that never would, were fruit trees.

And he simply could not seem to know why, he tried everything, from manually shifting the electromagnetic field generators or tweaking the atmospheric or soil specificity, even going as far as creating a synthetic seasonal accelerator to boost the bud-flower-fruit process but all without success. It would always stop and rot at the flower phase.

Until one night, where he had worked on it for weeks on end and fell asleep of fatigue while modifying the liquid crystals. That night, he had a dream, in his dream, he saw the tree in wild flames until nothing but ashes remained of it, from the ashes grew another tree, lush and bearing fruits. All while the tree seemed to be whispering to him "Burn me and there is life after that." He did, and the tree bore life. It was an apple tree and he named it the "Long Thriving Tree" or "LTT".

Moon mission, a decade of preparation, will be launching soon and deployed on the most advanced technology available to humanity to this day. Crypto and NFTs. Be part of this epic journey into the great unknown.

The mission: Land on the moon and gain glory. Yet who knows what awaits us? Just like journeying into the cryptospace, this is uncharted territory and no one knows what's ahead of us... Only the brave... Only.
