HER MAJESTY’S GATED WORLD

As an economic and ruling powerhouse, the Great Empire controls the issuance and trade of BUN, LTT, and USDC reward credits. Decisions by its sitting parliamentarians affect Loot NFT World. Following the last war, border controls are tight and only invitees can enter. Each Sunday, all eyes focus on the Arena and the Crown’s Podium, where battle-bidding auctions rage. The battle pit is not for the fainthearted and strategy plays a crucial role in winning.

OFFICIAL PERSPECTIVE SHEET FOR FILING
Indicate vantage point for each drawing. Copy and mark each sheet required prior to filing.

Guide - Vantage point should be indicated as shown in the diagram:

Official perspective sheet for filing, featuring a grid of circles and a central rectangular area for drawing. The sheet includes a header with instructions and a diagram illustrating the vantage point for perspective drawing.

The sheet is divided into four quadrants by a central horizontal and vertical line. The central area is a large rectangle, and the four quadrants are filled with a grid of circles. The circles are arranged in a perspective grid, with the spacing between them increasing as they move away from the center. The central rectangle is defined by a thick black border. The grid of circles is composed of thin black lines forming the circles.

Two diagonal lines extend from the right side of the central rectangle, one towards the top-right and one towards the bottom-right, meeting the outer edges of the sheet. These lines are part of the perspective grid.
